

FeatureCAM 2.5D Turning Essentials

1 Day Training Course

Audience

This course will instruct Engineers in the best usage and approaches for using FeatureCAM for 2.5D Turning..

Prerequisites

No previous CAM experience is required although engineers must be PC literate and have an understanding of Engineering and Manufacturing principles.

Agenda

- Autodesk FeatureCAM Interface
- FeatureCAM getting started
- Turning - AFR automatic feature recognition
- Facing & Boring
- Groove options
- Drilling
- Geometry creation techniques
- Tool databases
- Machining configurations
- Simulating and Post Processing the Job

All courses are normally run on the latest software release. The agenda can be varied to suit a clients preferences and requirements. On completion of the course you will be presented with an Autodesk Authorised Completion Certificate. All our courses follow Autodesk approved coursework.

Controls Engineer
Animax Ltd

“

I've done various courses over the years and this was by far the most enjoyable to date. I found the timing of the course to be spot on and Alex's attentiveness to questions excellent. The material was delivered in such a way that it was easily digestible and each topic built on the one previous.
