

PowerMill Basic Essentials

5 Day Autodesk Accredited Training Course

Objectives

This course will instruct Engineers in the basic usage and approaches for using PowerMill for manufacturing

Audience

No previous CAM experience is required although engineers must have an understanding of Engineering and Manufacturing principles.

Agenda

- Setup
- 3D Area Clearance and Finishing
- Toolpath Z Limits
- Leads and Links
- Boundaries
- Toolpath Editing
- Tool Collision Checking
- Patterns
- Curve Editor
- 2.5D Machining
- NC Programs

- 3+2 Basic Example
- 4 Axis Rotary Machining

All courses are normally run on the latest software release. The agenda can be varied to suit a clients preferences and requirements. On completion of the course you will be presented with an Autodesk Authorised Completion Certificate. All our courses follow Autodesk approved coursework

Craig Davies

Business Development Manager
Kohler

“

The Cadspec AutoCAD trainer was great! Everything that I had questions about - even off topic of the course - were answered clearly & coherently. When we get new starters join Kohler that require AutoCAD training, I will definitely recommend the Cadspec course to them.
