This course will instruct Engineers in the best usage and approaches for using Fusion for milling.

## Audience

PC literate engineers who understand engineering and manufacturing principles.

## Agenda

- Fusion 360 CAM interface
- Creating a job setup
- Creating & using tools in the library
- 2D strategies
- 3D strategies
- 3+2 workflow
- 4 axis rotary strategies
- Hole operations
- Simulating & post processing the job

*“The trainer was excellent and very helpful. He went above and beyond to help us get to grips with the software. The training centre and facilities are excellent and I would fully recommend Cadspec to any company looking for training on any CAD package. They will be our first point of contact for any future training.”*

David - Mucklow & Harris Ltd
