

### Objectives

This course will instruct Engineers in the best usage and approaches for using FeatureCAM for multi-axis turning with live tooling.

### Audience

FeatureCAM users who have previously completed turn or turn/mill training.

### Agenda

- FeatureCAM Interface
- Getting started
- Import Solid model
- Create stock and setup
- Extract revolved surface
- Modify & create surface geometry
- Surface machining
- Modify tool axis
- Advanced surface manipulation
- Advanced unwrap/wrap options
- Isoline surface machining
- Hole extraction
- B-axis machining
- Simulating and Post Processing the Job

All courses are normally run on the latest software release. The agenda can be varied to suit a clients preferences and requirements. On completion of the course you will be presented with an Autodesk Authorised Completion Certificate. All our courses follow Autodesk approved coursework

### David Williams

Senior Engineer  
Mucklow & Harris Ltd

“ The course trainer was excellent and very helpful and went above and beyond to help us get to grips with the software that was new to us. The training centre and facilities are excellent and I would fully recommend Cadspec to any company looking for training any CAD package. They will be our first point of contact for any future training ”
